| **Title** | [Login][Email] Login with Email is Not Case Sensitive |
| **Desc** | The login functionality currently does not treat email addresses as case sensitive. Users can log in with their email address regardless of whether they enter it in uppercase, lowercase, or a mix of both. This behavior may not align with expected security practices, where email addresses should be treated as case-sensitive to prevent potential security vulnerabilities or unauthorized access. |
| **Steps** | 1. Navigate to the login page.<br>2. Enter a registered email address in a different case.<br>3. Enter the correct password.<br>4. Click the "Login" button. |

| **Title** | [Login] Font Color Merges with Background in Dark Mode |
| **Desc** | When switching to dark mode, the font color in certain sections of the application blends with the background, making the text difficult or impossible to read. This issue affects the user experience, as important information becomes inaccessible due to poor contrast between the text and the background. |
| **Steps** | 1. Navigate to the application's settings.<br>2. Switch the theme to dark mode.<br>3. Observe the text in various sections of the application.<br>4. Notice that the font color merges with the dark background, making the text unreadable. |
