

| No | Function/Test Scenario Name | Test Condition | Test Case | Test Case Description | Pre-Condition | Steps Description | Expected Result | Actual Result | Status |
|----|-----------------------------|----------------|---|---|--|--|--|--|--------|
| 1. | Login | Positive Test | Login with a valid email and valid password. | To ensure that user can login after input valid email and valid password. | User already registered and logged out | 1. Open SecondHand application 2. Navigate to the login page. 3. Input registered email. Email : kate@gmail.com 4. Input registered password. Password : kisahini 5. Tap login button | User logged in and dashboard page shown | User logged in and dashboard page shown | PASS |
| | | | Password Masking | Verify that the password is masked by default. | User is on the login screen. | 1. Enter a valid password in the "Password" field. 2. Observe the password masking (dots or asterisks). | The password is masked by default, ensuring privacy | The password is masked by default, ensuring privacy | PASS |
| | | | Password Visibility Toggle | Test the visibility toggle for the password field. | User is on the login screen with a password entered. | 1. Enter a valid password in the "Password" field. 2. Tap the eye icon to toggle password visibility. | Password is displayed in plain text when the eye icon is tapped; it is hidden (as dots) when tapped again. | Password is displayed in plain text when the eye icon is tapped; it is hidden (as dots) when tapped again. | PASS |
| | | | Successful login with special characters in the password. | Verify that a user can successfully log in using a password that contains special characters. | User has an active account with a password that includes special characters. | 1. Open SecondHand application 2. Navigate to the login page. 3. Enter a valid email in the email field. Email : juliet2@gmail.com 4. Enter a valid password that includes special characters in the password field. Password : k!sa4h!n! 5. Tap the "Login" button. | User is successfully logged in and redirected to the dashboard/home page. | User is successfully logged in and redirected to the dashboard/home page. | PASS |
| | | | Case-sensitive Email Handling | Verify the email field handles case sensitivity correctly | User is on the login page | 1. Open SecondHand application. 2. Navigate to the login page. 3. Enter a valid email in a different case format (e.g., uppercase, lowercase) in the email field. 4. Enter a valid password in the password field. 5. Tap the login button. | User successfully logs in | User receives an error message indicating invalid credentials. | FAILED |
| | | | Login with Different Networks | Test login over different network types (Wi-Fi, 4G/5G). | User is on the login screen and has access to multiple networks. | 1. Connect to Wi-Fi. 2. Enter valid credentials and log in. 3. Log out. 4. Switch to 4G/5G network. 5. Log in again. | User can successfully log in using different network connections (Wi-Fi, 4G/5G). | User successfully log in using different network connections (Wi-Fi, 4G/5G). | PASS |
| | | Negative Test | Login with a valid email and invalid password | To ensure the system rejects invalid passwords. | User is on the login page | 1. Open login page. 2. Enter valid email. 3. Enter invalid password. 4. Tap login button. | User receives an error message indicating invalid credentials. | User receives an error message indicating invalid credentials. | PASS |
| | | | Login with an invalid email and valid password | To ensure the system rejects invalid email. | User is on the login page | 1. Open login page. 2. Enter invalid email. 3. Enter valid password. 4. Tap login button. | User receives an error message indicating invalid credentials. | User receives an error message indicating invalid credentials. | PASS |
| | | | Login with an invalid email and invalid password | To ensure the system rejects invalid credentials. | User is on the login page | 1. Open login page. 2. Enter invalid email. 3. Enter invalid password. 4. Tap login button. | User receives an error message indicating invalid credentials. | User receives an error message indicating invalid credentials. | PASS |

| | | | | | | | | | |
|----|--------------|---------------|---|--|--|---|--|--|------|
| | | | Login with a blank email and valid password | To ensure the system requires a email. | User is on the login page | 1. Open login page. 2. Leave email field blank. 3. Enter valid password. 4. Tap login button. | User receives an error message indicating that email is required. | User receives an error message indicating that email is required. | PASS |
| | | | Login with a valid email and blank password | To ensure the system requires a password. | User is on the login page | 1. Open login page. 2. Enter valid email. 3. Leave password field blank. 4. Tap login button. | User receives an error message indicating that password is required. | User receives an error message indicating that password is required. | PASS |
| | | | Login with blank email and blank password | To ensure the system requires both email and password. | User is on the login page | 1. Open login page. 2. Leave email and password fields blank. 3. Tap login button. | User receives an error message indicating that email and password are required. | User receives an error message indicating that email and password are required. | PASS |
| | | | Login with a valid email and an incorrect case-sensitive password | To ensure the system is case-sensitive for passwords. | User is on the login page | 1. Open login page. 2. Enter valid email. 3. Enter incorrect case-sensitive password. 4. Tap login button. | User receives an error message indicating invalid credentials. | User receives an error message indicating invalid credentials. | PASS |
| 2. | Registration | Postive Test | Sign-Up with Valid Input | Test the sign-up feature with valid data to ensure successful registration. | aplicationlication is active and no users are logged in. | 1. Navigate to the sign-up page. 2. Input valid data: - Name: "Romeo" - Email: "romeo@gamil.com" - Password: "sawimentah" 3. Tap "Sign Up" button. | - Registration is successfully processed. - User is redirected to the confirmation page or main page. | - Registration is successfully processed. - User is redirected to the confirmation page or main page. | PASS |
| | | | Already Registered Email | Test the sign-up feature with an email that is already registered to ensure the system provides an aplicationropriate error message. | aplicationlication is active and no users are logged in. The email being tested is already registered in the system. | 1. Navigate to the sign-up page. 2. Input valid data with an already registered email: - Name: "Gustav" - Email: "romeo@gmail.com" - Password: "blabla" 3. Tap "Sign Up" button. | - Registration is rejected. - Error message is displayed indicating the email is already in use (e.g., "Email already registered"). | - Registration is rejected. - Error message is displayed indicating the email is already in use (e.g., "Email already registered"). | PASS |
| | | | Password Masking | Verify that the password is masked by default. | User is on the sign up screen. | 1. Enter a valid password in the "Password" field. 2. Observe the password masking (dots or asterisks). | The password is masked by default, ensuring privacy | The password is masked by default, ensuring privacy | PASS |
| | | | Password Visibility Toggle | Test the visibility toggle for the password field. | User is on the sign up screen with a password entered. | 1. Enter a valid password in the "Password" field. 2. Tap the eye icon to toggle password visibility. | Password is displayed in plain text when the eye icon is tapped; it is hidden (as dots) when tapped again. | Password is displayed in plain text when the eye icon is tapped; it is hidden (as dots) when tapped again. | PASS |
| | | Negative Test | Empty Fields | Verify behavior when submitting with empty fields | Registration form is available | 1. Leave all fields (name, email, password, confirm password) empty. 2. Tap the "Register" button. | Registration fails. System displays an error message indicating that all fields are required. | Registration fails. System displays an error message indicating that all fields are required. | PASS |

| | | | | | | | | | |
|--|--|--|------------------------------|---|---------------------------------|---|--|---|--------|
| | | | Empty Name Field | Verify behavior when the name field is empty | Registration form is accessible | 1. Leave the name field empty. 2. Enter valid email and password. 3. Tap the "Register" button. | Registration fails. System displays an error message indicating that the name field is required. | Registration fails. System displays an error message indicating that the name field is required. | PASS |
| | | | Empty Email Field | Verify behavior when the email field is empty | Registration form is accessible | 1. Leave the email field empty. 2. Enter valid name and password. 3. Tap the "Register" button. | Registration fails. System displays an error message indicating that the email field is required. | Registration fails. System displays an error message indicating that the email field is required. | PASS |
| | | | Empty Password Field | Verify behavior when the password field is empty | Registration form is accessible | 1. Leave the password field empty. 2. Enter valid name and email. 3. Tap the "Register" button. | Registration fails. System displays an error message indicating that the password field is required. | Registration fails. System displays an error message indicating that the password field is required. | PASS |
| | | | Empty Number Phone Field | Verify behavior when the number phone field is empty | Registration form is accessible | 1. Leave the number phone field empty. 2. Enter valid name and password. 3. Tap the "Register" button. | Registration fails. System displays an error message indicating that the number phone field is required. | Registration fails. System displays an error message indicating that the number phone field is required. | PASS |
| | | | Empty Kota Field | Verify behavior when the kota field is empty | Registration form is accessible | 1. Leave the kota field empty. 2. Enter valid name and password. 3. Tap the "Register" button. | Registration fails. System displays an error message indicating that the city field is required. | Registration fails. System displays an error message indicating that the city field is required. | PASS |
| | | | Empty Alamat Field | Verify behavior when the alamat field is empty | Registration form is accessible | 1. Leave the alamat field empty. 2. Enter valid name and password. 3. Tap the "Register" button. | Registration fails. System displays an error message indicating that the Alamat field is required. | Registration fails. System displays an error message indicating that the Alamat field is required. | PASS |
| | | | Name with Special Characters | Verify behavior when the name field contains special characters | Registration form is accessible | 1. Enter a name with special characters (e.g., !@#\$%^&*). 2. Enter valid email and password. 3. Tap the "Register" button. | Registration fails or system restricts special characters. System displays an error message indicating invalid characters in the name field. | Registration successfully processed. System do not displays an error message indicating invalid characters in the name field. | FAILED |
| | | | Name Exceeds Character Limit | Verify behavior when the name exceeds the character limit | Registration form is accessible | 1. Enter a name that exceeds the maximum allowed characters. 2. Enter valid email and password. 3. Tap the "Register" button. | The system stops accepting input when the character limit for the name is reached. | The system stops accepting input when the character limit for the name is reached. | PASS |

| | | | | | | | | | |
|--|--|--|--|--|--|--|--|--|--------|
| | | | Invalid Email Format | Validate email format and response for invalid emails | Registration form is available | 1. Enter a name and password. 2. Enter an invalid email address. 3. Tap the "Register" button. | Registration fails. System displays an error message indicating an invalid email format. | Registration fails. System displays an error message indicating an invalid email format. | PASS |
| | | | Multiple "@" Symbols | Verify handling of emails with multiple "@" symbols | Registration form is available | 1. Enter a name and password. 2. Enter an email address with multiple "@" symbols (e.g., "user@domain@domain.com"). 3. Tap the "Register" button. | Registration fails. System displays an error message indicating an invalid email format. | Registration fails. System displays an error message indicating an invalid email format. | PASS |
| | | | Excessively Long Email | Verify handling of excessively long email addresses | Registration form is available | 1. Enter a name and password.. 2. Enter an email address exceeding the character limit (e.g., a very long string followed by "@domain.com"). 3. Tap the "Register" button. | The system stops accepting input when the character limit for the email is reached. | The system stops accepting input when the character limit for the email is reached. | PASS |
| | | | Weak Passwords | Verify detection of commonly used or weak passwords | Registration form is available | 1. Enter a name, email address. 2. Enter a commonly used password (e.g. "1"). 3. Tap the "Register" button. | Registration fails. System displays an error message indicating the password is weak or commonly used. | Registration fails. System displays an error message indicating the password is weak or commonly used. | PASS |
| | | | Password Exceeds Character Limit | Verify behavior when the password exceeds the character limit | Registration form is accessible | 1. Enter a name and valid email. 2. Enter a password that exceeds the maximum allowed characters. 3. Tap the "Register" button. | The system stops accepting input when the character limit for the password is reached. | The system stops accepting input when the character limit for the password is reached. | PASS |
| | | | Phone Number with Fewer Digits | Test Phone Number field with fewer than 10 digits. | User is logged in and on the profile page. | 1. Enter a phone number with fewer than 10 digits (e.g., "0812345"). 2. Tap the Save button. | The system should display an error message indicating that the phone number length is incorrect. | The system do not display an error message indicating that the phone number length is incorrect. | FAILED |
| | | | Phone Number with More Digits | Test Phone Number field with more than 13 digits. | User is logged in and on the profile page. | 1. Enter a phone number with more than 13 digits (e.g., "081234567890123"). 2. Tap the Save button. | The system should display an error message indicating that the phone number length is incorrect. | The system do not display an error message indicating that the phone number length is incorrect. | FAILED |
| | | | Phone Number with Invalid Characters | Test Phone Number field with invalid characters. | User is logged in and on the profile page. | 1. Enter a phone number with invalid characters (e.g., "0812ABCD5678"). 2. Tap the Save button. | The system only opens a numeric keyboard. | The system only opens a numeric keyboard. | PASS |
| | | | Phone Number with Incorrect Country Code | Test Phone Number field with an incorrect or unsupported country code. | User is logged in and on the profile page. | 1. Enter a phone number with an incorrect or unsupported country code. 2. Tap the Save button. | The system should display an error message indicating an incorrect or unsupported country code. | The system do not display an error message indicating an incorrect or unsupported country code. | FAILED |

| | | | | | | | | | |
|----|--------|---------------|---------------------------------------|---|--|---|---|---|--------|
| | | | Phone Number with Leading Zeros | Test Phone Number field with leading zeros. | User is logged in and on the profile page. | 1. Enter a phone number with leading zeros. 2. Tap the Save button. | The system should display an error message indicating that leading zeros are not allowed. | The system do not display an error message indicating that leading zeros are not allowed. | FAILED |
| | | | Phone Number with Special Characters | Test Phone Number field with special characters. | User is logged in and on the profile page. | 1. Enter a phone number with special characters. 2. Tap the Save button. | The system should display an error message indicating invalid characters in the Phone Number field. | The system do not display an error message indicating invalid characters in the Phone Number field. | FAILED |
| | | | City Field with Numbers Only | Test city field with a city name consisting of numbers only. | User is on the form screen. | 1. Enter a city name with numbers only (e.g., "12345") in the "City" field. 2. Complete any other required fields. 3. Submit the form. | The system displays an error message indicating that the city name must contain letters, not just numbers. | The system do not displays an error message indicating that the city name must contain letters, not just numbers. | FAILED |
| | | | City Field with Special Characters | Test city field with a city name containing special characters. | User is on the form screen. | 1. Enter a city name with special characters (e.g., "Jak@rta!") in the "City" field. 2. Complete any other required fields. 3. Submit the form. | The system displays an error message indicating that special characters are not allowed in the city name. | The system do not displays an error message indicating that special characters are not allowed in the city name. | FAILED |
| | | | City Field with Extremely Long Name | Test city field with a city name that exceeds the maximum length limit. | User is on the form screen. | 1. Enter a city name that exceeds the maximum allowed length (e.g., 256 characters) in the "City" field. 2. Complete any other required fields. 3. Submit the form. | The system stops accepting input when the character limit is reached, and may display an error message. | The system stops accepting input when the character limit is reached, and may display an error message. | PASS |
| | | | Address Field with Only Numbers | Test address input with numbers only. | User is on the form screen. | 1. Enter a numeric-only address (e.g., "123456789") in the "Address" field. 2. Complete any other required fields. 3. Submit the form. | The system displays an error message indicating that the address must include letters and not just numbers. | The system did not displays an error message indicating that the address must include letters and not just numbers. | FAILED |
| | | | Address Field with Special Characters | Test address input with special characters. | User is on the form screen. | 1. Enter an address with special characters (e.g., "123 Main St. @#\$\$%^") in the "Address" field. 2. Complete any other required fields. 3. Submit the form. | The system displays an error message indicating that special characters are not allowed in the address field. | The system did not displays an error message indicating that special characters are not allowed in the address field. | FAILED |
| 3. | Search | Positive Test | Valid Search Term | Verify relevant results for a valid search term | Search bar is accessible | 1. Enter the search term "kipas angin" in the search bar. 2. Tap the search button. | A list of kipas angin products is displayed as search results. | A list of kipas angin products is displayed as search results. | PASS |

| | | | | | | | | | |
|--|--|---------------|---|---|--------------------------|--|---|---|--------|
| | | | Multiple Search Terms | Verify handling of multiple search terms | Search bar is accessible | 1. Enter the search term "Fix Formula 44" in the search bar. 2. Tap the search button. | A list of gunting kertas is displayed as search results. | A list of gunting kertas is displayed as search results. | PASS |
| | | | Case-Insensitive Search | Verify case-insensitivity of search function | Search bar is accessible | 1. Enter the search term "kipas angin" in the search bar. 2. Tap the search button. 3. Enter the search term "KIPAS ANGIN" in the search bar. 4. Tap the search button. | Both searches return the same set of results. | Both searches return the same set of results. | PASS |
| | | | Exact Match Prioritization | Verify prioritization of exact matches | Search bar is accessible | 1. Enter the search term "coba malfy 81" in the search bar. 2. Tap the search button. | The product "dumin" is displayed as the top search result. | The product "dumin" is displayed as the top search result. | PASS |
| | | | Pagination for Large Result Sets | Verify pagination for large search results | Search bar is accessible | 1. Enter the search term "a" in the search bar. 2. Tap the search button. | A list of a is displayed with pagination options (e.g., next/previous buttons). | A list of a is displayed with pagination options (e.g., next/previous buttons). | PASS |
| | | | Special Characters in Search Term | Verify handling of search terms with special characters | Search bar is accessible | 1. Enter a search term containing special characters. | Search results are displayed without errors or unexpected behavior. | Search results are displayed without errors or unexpected behavior. | PASS |
| | | Negative Test | Non-existent Search Term | Verify handling of non-existent search terms | Search bar is accessible | 1. Enter a search term for a product that does not exist in the inventory. 2. Tap the search button. | System displays a message indicating no results found or item not found. | System not displays a message indicating no results found or an invalid search term. | FAILED |
| | | | Search for Extremely Long Search Term | Verify handling of excessively long search terms | Search bar is accessible | 1. Enter an extremely long search term (exceeding character limit). 2. Tap the search button. | System displays an error message indicating search term is too long or truncates the search term. | System not displays an error message indicating search term is too long or truncates the search term. | FAILED |
| | | | Search for Multiple Keywords with No Spaces | Verify handling of search terms without spaces | Search bar is accessible | 1. Enter multiple keywords without spaces (e.g., "kipasangin"). 2. Tap the search button. | The system is capable of processing search queries with spaces, effectively recognizing and handling multiple words as separate search terms. | The system is capable of processing search queries with spaces, effectively recognizing and handling multiple words as separate search terms. | PASS |
| | | | Search for Incorrectly Spelled Words | Verify handling of misspelled search terms | Search bar is accessible | 1. Enter a misspelled search term (e.g., "iphnoe"). 2. Tap the search button. | System displays relevant search results based on similar or corrected terms, or displays a message indicating no results found. | System not displays relevant search results based on similar or corrected terms, or displays a message indicating no results found. | FAILED |

| | | | | | | | | | |
|---|-------------|---------------|---|--|---|--|---|---|------|
| 4 | Add Product | Positive Test | Add a new product with all required fields filled | To ensure that a new product can be edited with complete information | Seller is logged in and on the product edit page. | 1. Tap on "Jual" button. 2. Fill in all required fields: product name, price, category, description, and upload a product image. 3. Tap "Terbitkan" | The new product is successfully edited to the seller's inventory and can be viewed on the product list. | The new product is successfully edited to the seller's inventory and can be viewed on the product list. | PASS |
| | | | Add Product with a Name Containing Special Characters | Verify that a product can be edited with a name that includes special characters. | Seller is logged in and on the product edit page. | 1. Tap on "Jual" button. 2. Input valid product details with a name containing special characters: - Product Name: "GadgetX!@#2024" - Price: "1000000" - Category: "Elektronik" - Description: "A special gadget with special characters in its name." 3. Tap "Terbitkan" button. | The product is successfully edited, and a success message is displayed. | The product is successfully edited, and a success message is displayed. | PASS |
| | | | Add Product with Name Containing Spaces | Verify that a product can be edited with a name that contains spaces. | Seller is logged in and on the product edit page. | 1. Tap on "Jual" button. 2. Input valid product details with a name containing spaces: - Product Name: "Premium Gadget 2024" - Price: "1000000" - Category: "Elektronik" - Description: "A special gadget with special characters in its name." 3. Tap "Terbitkan" button. | The product is successfully edited, and a success message is displayed. | The product is successfully edited, and a success message is displayed. | PASS |
| | | | Add Product with Name Containing Numbers | Verify that a product can be edited with a name that includes numbers. | Seller is logged in and on the product edit page. | 1. Tap on "Jual" button. 2. Input valid product details with a name containing numbers: - Product Name: "Gadget123" - Price: "1000000" - Category: "Elektronik" - Description: "A special gadget with special characters in its name." - Category: "Gadgets" 3. Tap "Terbitkan" button. | The product is successfully edited, and a success message is displayed. | The product is successfully edited, and a success message is displayed. | PASS |
| | | | Add Product with Name Containing Mixed Case | Verify that a product can be edited with a name that contains mixed case letters (upper and lower case). | Seller is logged in and on the product edit page. | 1. Tap on "Jual" button. 2. Input valid product details with a name containing mixed case letters: - Product Name: "GadgetX2024" - Price: "1000000" - Category: "Elektronik" - Description: "A special gadget with special characters in its name." 3. Tap "Terbitkan" button. | The product is successfully edited, and a success message is displayed. | The product is successfully edited, and a success message is displayed. | PASS |
| | | | Add Product with Valid Price | Verify that a product can be edited with a valid price. | Seller is logged in and on the product edit page. | 1. Tap on "Jual" Button. 2. Input valid product details with a valid price: - Product Name: "GadgetX" - Price: "1000000" - Category: "Elektronik" - Description: "A special gadget with special characters in its name." 3. Tap "Terbitkan" button. | The product is successfully edited, and a success message is displayed. | The product is successfully edited, and a success message is displayed. | PASS |

| | | | | | | | | | |
|--|--|---------------|--|---|---|--|--|--|------|
| | | | Add Product with Valid Category Selection | Verify that a product can be edited by selecting a valid category from the dropdown. | Seller is logged in and on the product edit page. | 1. Tap on "Jual" Button. 2. Input valid product details: - Product Name: "Free Gadget" - Price: "1234848488" - Category: Elektronik - Description: "A gadget that is free." 3. Tap "Terbitkan" button. | The product is successfully edited, and a success message is displayed. | The product is successfully edited, and a success message is displayed. | PASS |
| | | | Add Product with Valid Description | Verify that a product can be edited with a valid description. | Seller is logged in and on the product edit page | 1. Tap on "Jual" Button. 2. Input valid product details with a valid description: - Product Name: "Smart Gadget" - Price: "1234848488" - Category: Elektronik - Description: "A high-quality gadget with advanced features." 3. Tap "Terbitkan" button. | The product is successfully edited, and a success message is displayed. | The product is successfully edited, and a success message is displayed. | PASS |
| | | | Add Product with Valid Description | Verify that a product can be edited with a valid description. | Seller is logged in and on the product edit page. | 1. Tap on "Jual" Button. 2. Input valid product details with a valid description: - Product Name: "Smart Gadget" - Price: "1234848488" - Category: Elektronik - Description: "A high-quality gadget with advanced features." 3. Tap "Terbitkan" button. | The product is successfully edited, and a success message is displayed. | The product is successfully edited, and a success message is displayed. | PASS |
| | | | Add Product with Description Containing Special Characters | Verify that a product can be edited with a description that includes special characters. | Seller is logged in and on the product edit page. | 1. Tap on "Jual" Button. 2. Input valid product details with a description containing special characters: - Product Name: "Special Character Gadget" - Price: "1234848488" - Category: Elektronik - Description: "A gadget with special characters like @, #, and &." 3. Tap "Terbitkan" button. | The product is successfully edited, and a success message is displayed. | The product is successfully edited, and a success message is displayed. | PASS |
| | | | Upload Image with Supported Format | Verify that an image can be successfully uploaded when it is in a supported format (e.g., JPEG, PNG). | Seller is logged in and on the product edit page. | 1. Tap on "Jual" Button. 2. Tap the "Upload Image" button. 3. Select an image file in JPEG format. 4. Tap "Terbitkan" button. | The image is successfully uploaded, and a thumbnail or preview is displayed. | The image is successfully uploaded, and a thumbnail or preview is displayed. | PASS |
| | | | Upload Image with Maximum Allowed Size | Verify that an image of the maximum allowed size can be uploaded. | Seller is logged in and on the product edit page. | 1. Tap on "Jual" Button. 2. Tap the "Upload Image" button. 3. Select an image file at the maximum allowed size. 4. Tap "Terbitkan" button. | The image is successfully uploaded, and a thumbnail or preview is displayed. | The image is successfully uploaded, and a thumbnail or preview is displayed. | PASS |
| | | Negative Test | Empty Fields | Verify behavior when submitting with empty fields | Seller is logged in and on the product edit page. | 1. Leave all fields (Nama Produk, Harga Produk, Kategori, Deskripsi, Upload gambar) empty. 2. Tap the "Register" button. | The product is not edited, and an error message is displayed indicating that the product name is required. | The product is not edited, and an error message is displayed indicating that the product name is required. | PASS |

| | | | | | | | | | |
|--|--|--|--|---|--|--|---|--|--------|
| | | | Add Product with an Empty Name | Verify that the system prevents adding a product with an empty name. | Seller is logged in and on the product edit page. | 1. Tap on "Jual" button. 2. Input valid product details but leave the product name empty: - Product Name: - Price: "1000000" - Category: "Elektronik" - Description: "A special gadget with special characters in its name." 3. Tap "Terbitkan" button. | The product is not edited, and an error message is displayed indicating that the product name is required. | The product is not edited, and an error message is displayed indicating that the product name is required. | PASS |
| | | | Add Product with a Name Exceeding Maximum Length | Verify that the system prevents adding a product with a name that exceeds the maximum allowed length. | Seller is logged in and on the product edit page. | 1. Tap on "Jual" button. 2. Input valid product details but use a name that is longer than the allowed length - Product Name: a*100 - Price: "1000000" - Category: "Elektronik" - Description: "A special gadget with special characters in its name." 3. Tap "Terbitkan" button. | The system stops accepting input when the character limit is reached, and may display an error message. | The system stops accepting input when the character limit is reached, and may display an error message. | PASS |
| | | | Add Product with a Duplicate Name | Verify that the system prevents adding a product with a name that already exists. | Seller is logged in and on the product edit page. A product with the same name already exists. | 1. Tap on "Jual" button. 2. Input valid product details but use a name that already exists: - Product Name: "GadgetX2024" - Price: "1000000" - Category: "Elektronik" - Description: "A special gadget with special characters in its name." 3. Tap "Terbitkan" button. | The product is not edited, and an error message is displayed indicating that the product name already exists. | The product edited, and an error message is not displayed indicating that the product name already exists. | FAILED |
| | | | Add Product with Name Containing Only Special Characters | Verify that the system prevents adding a product with a name that contains only special characters. | Seller is logged in and on the product edit page. | 1. Tap on "Jual" button. 2. | | | | Add Product with Negative Price | Verify that the system prevents adding a product with a negative price. | Seller is logged in and on the product edit page. | 1. Tap on "Jual" Button. 2. Input valid product details but use a negative price: - Product Name: "Free Gadget" - Price: "-109000" - Category: Elektronik - Description: "A gadget that is free." 3. Tap "Terbitkan" button. | The system stops accepting input when the price is negative. | The system stops accepting input when the price is negative. | PASS |

| | | | | | | | | | |
|--|--|--|--|---|---|--|--|---|--------|
| | | | Add Product with Price Exceeding Maximum Allowed Limit | Verify that the system prevents adding a product with a price that exceeds the maximum allowed limit. | Seller is logged in and on the product edit page. The maximum allowed price is defined (e.g., 99999....). | 1. Tap on "Jual" Button. 2. Input valid product details but use a price exceeding the maximum allowed limit: - Product Name: "Free Gadget" - Price: "99999999999..." - Category: Elektronik - Description: "A gadget that is free." 3. Tap "Terbitkan" button. | The system stops accepting input when the character limit is reached, and may display an error message. | The system stops accepting input when the character limit is reached. | PASS |
| | | | Add Product with Non-Numeric Price | Verify that the system prevents adding a product with a non-numeric price. | Seller is logged in and on the product edit page. | 1. Tap on "Jual" Button. 2. Input valid product details but use a non-numeric price: - Product Name: "Free Gadget" - Price: "abcdg" - Category: Elektronik - Description: "A gadget that is free." 3. Tap "Terbitkan" button. | The product is not edited, and an error message is displayed indicating that the price must be numeric. | The product is not edited, and an error message is displayed indicating that the price must be numeric. | PASS |
| | | | Add Product with Empty Price Field | Verify that the system prevents adding a product when the price field is empty. | Seller is logged in and on the product edit page. | 1. Tap on "Jual" Button. 2. Input valid product details but leave the price field empty: - Product Name: "Free Gadget" - Price: "0.00" - Category: Elektronik - Description: "A gadget that is free." 3. Tap "Terbitkan" button. | The product is not edited, and an error message is displayed indicating that the price is required. | The product is not edited, and an error message is displayed indicating that the price is required. | PASS |
| | | | Add Product with Price Containing Special Characters | Verify that the system prevents adding a product with a price that contains special characters. | Seller is logged in and on the product edit page. | 1. Tap on "Jual" Button. 2. Input valid product details but use a price with special characters: - Product Name: "Free Gadget" - Price: "89776689#\$" - Category: Elektronik - Description: "A gadget that is free." 3. Tap "Terbitkan" button. | The product is not edited, and an error message is displayed indicating that the price is invalid. | The product is not edited, and an error message is displayed indicating that the price is invalid. | PASS |
| | | | Add Product without Selecting a Category | Verify that the system prevents adding a product when no category is selected. | Seller is logged in and on the product edit page. | 1. Tap on "Jual" Button. 2. Input valid product details but leave the category unselected: - Product Name: "Free Gadget" - Price: "89776689" - Category: - Description: "A gadget that is free." 3. Tap "Terbitkan" button. | The product is not edited, and an error message is displayed indicating that the category is required. | The product is not edited, and an error message is displayed indicating that the category is required. | PASS |
| | | | City Field with Numbers Only | Test add product with a city name consisting of numbers only. | User is on the form screen. | 1. Enter a city name with numbers only (e.g., "12345") in the "City" field. 2. Complete any other required fields. 3. Submit the form. | The system displays an error message indicating that the city name must contain letters, not just numbers. | The system do not displays an error message indicating that the city name must contain letters, not just numbers. | FAILED |

| | | | | | | | | | |
|--|--|--|---|---|---|--|---|---|--------|
| | | | City Field with Special Characters | Test add product with a city name containing special characters. | User is on the form screen. | 1. Enter a city name with special characters (e.g., "Jak@rta!") in the "City" field. 2. Complete any other required fields. 3. Submit the form. | The system displays an error message indicating that special characters are not allowed in the city name. | The system do not displays an error message indicating that special characters are not allowed in the city name. | FAILED |
| | | | City Field with Extremely Long Name | Test add product with a city name that exceeds the maximum length limit. | User is on the form screen. | 1. Enter a city name that exceeds the maximum allowed length (e.g., 256 characters) in the "City" field. 2. Complete any other required fields. 3. Submit the form. | The system stops accepting input when the character limit is reached, and may display an error message. | The system stops accepting input when the character limit is reached, and may display an error message. | PASS |
| | | | Add Product with Empty Description | Verify that the system prevents adding a product when the description field is empty. | Seller is logged in and on the product edit page. | 1. Tap on "Jual" Button. 2. Input valid product details but leave the description field empty: - Product Name: "Empty Description Gadget" - Price: "1234848488" - Category: "Electronics" - Description: "" 3. Tap "Terbitkan" button. | The product is not edited, and an error message is displayed indicating that the description is required. | The product is not edited, and an error message is displayed indicating that the description is required. | PASS |
| | | | Add Product with Description Containing Only Spaces | Verify that the system prevents adding a product when the description field contains only spaces. | Seller is logged in and on the product edit page. | 1. Tap on "Jual" Button. 2. Input valid product details but with a description containing only spaces: - Product Name: "Spaces Description Gadget" - Price: "1234848488" - Category: "Electronics" - Description: " " 3. Tap "Terbitkan" button. | The product is not edited, and an error message is displayed indicating that the description cannot be only spaces. | The product is not edited, and an error message is displayed indicating that the description cannot be only spaces. | PASS |
| | | | Upload Image with Unsupported Format | Verify that the system prevents uploading an image in an unsupported format (e.g., GIF). | Seller is logged in and on the product edit page. | 1. Tap on "Jual" Button. 2. Tap the "Upload Image" button. 3. Select an image file in GIF format. 4. Tap "Terbitkan" button. | The image is not uploaded, and an error message is displayed indicating that the format is unsupported. | The image is not uploaded, and an error message is displayed indicating that the format is unsupported. | PASS |
| | | | Upload Image Exceeding Maximum Size | Verify that the system prevents uploading an image that exceeds the maximum allowed size. | Seller is logged in and on the product edit page. | 1. Tap on "Jual" Button. 2. Tap the "Upload Image" button. 3. Select an image file exceeding the maximum size. 4. Tap "Terbitkan" button. | The image is not uploaded, and an error message is displayed indicating that the file size is too large. | The image is not uploaded, and error message is displayed indicating that the format is unsupported. | PASS |
| | | | Upload Image with No File Selected | Verify that the system handles the case where no file is selected for upload. | Seller is logged in and on the product edit page. | 1. Tap on "Jual" Button. 2. Tap the "Upload Image" button. 3. Do not select any image file. 4. Tap "Terbitkan" button. | The system should prompt the user to select a file or indicate that no file was selected. | The product is edited. | PASS |

| | | | | | | | | | |
|----|--------------|---------------|---|--|---|---|---|---|------|
| 5. | Edit Product | Positive Test | Add a new product with all required fields filled | To ensure that a new product can be edited with complete information | Seller is logged in and on the product edit page. | 1. Tap on "Edit" button. 2. Fill in all required fields: product name, price, category, description, and upload a product image. 3. Tap "Terbitkan" | The new product is successfully edited to the seller's inventory and can be viewed on the product list. | The new product is successfully edited to the seller's inventory and can be viewed on the product list. | PASS |
| | | | Add Product with a Name Containing Special Characters | Verify that a product can be edited with a name that includes special characters. | Seller is logged in and on the product edit page. | 1. Tap on "Edit" button. 2. Input valid product details with a name containing special characters: 3. Tap "Terbitkan" button. | The product is successfully edited, and a success message is displayed. | The product is successfully edited, and a success message is displayed. | PASS |
| | | | Add Product with Name Containing Spaces | Verify that a product can be edited with a name that contains spaces. | Seller is logged in and on the product edit page. | 1. Tap on "Edit" button. 2. Input valid product details with a name containing spaces: 3. Tap "Terbitkan" button. | The product is successfully edited, and a success message is displayed. | The product is successfully edited, and a success message is displayed. | PASS |
| | | | Add Product with Name Containing Numbers | Verify that a product can be edited with a name that includes numbers. | Seller is logged in and on the product edit page. | 1. Tap on "Edit" button. 2. Input valid product details with a name containing numbers: 3. Tap "Terbitkan" button. | The product is successfully edited, and a success message is displayed. | The product is successfully edited, and a success message is displayed. | PASS |
| | | | Add Product with Name Containing Mixed Case | Verify that a product can be edited with a name that contains mixed case letters (upper and lower case). | Seller is logged in and on the product edit page. | 1. Tap on "Edit" button. 2. Input valid product details with a name containing mixed case letters: 3. Tap "Terbitkan" button. | The product is successfully edited, and a success message is displayed. | The product is successfully edited, and a success message is displayed. | PASS |
| | | | Add Product with Valid Price | Verify that a product can be edited with a valid price. | Seller is logged in and on the product edit page. | 1. Tap on "Edit" Button. 2. Input valid product details with a valid price 3. Tap "Terbitkan" button. | The product is successfully edited, and a success message is displayed. | The product is successfully edited, and a success message is displayed. | PASS |
| | | | Add Product with Valid Category Selection | Verify that a product can be edited by selecting a valid category from the dropdown. | Seller is logged in and on the product edit page. | 1. Tap on "Edit" Button. 2. Input valid product details 3. Tap "Terbitkan" button. | The product is successfully edited, and a success message is displayed. | The product is successfully edited, and a success message is displayed. | PASS |
| | | | Add Product with Valid Description | Verify that a product can be edited with a valid description. | Seller is logged in and on the product edit page | 1. Tap on "Edit" Button. 2. Input valid product details with a valid description: - Product Name: "Smart Gadget" - Price: "1234848488" - Category: Elektronik - Description: "A high-quality gadget with advanced features." 3. Tap "Terbitkan" button. | The product is successfully edited, and a success message is displayed. | The product is successfully edited, and a success message is displayed. | PASS |
| | | | Add Product with Valid Description | Verify that a product can be edited with a valid description. | Seller is logged in and on the product edit page. | 1. Tap on "Edit" Button. 2. Input valid product details with a valid description 3. Tap "Terbitkan" button. | The product is successfully edited, and a success message is displayed. | The product is successfully edited, and a success message is displayed. | PASS |

| | | | | | | | | | |
|--|--|---------------|--|---|--|---|--|---|--------|
| | | | Add Product with Description Containing Special Characters | Verify that a product can be edited with a description that includes special characters. | Seller is logged in and on the product edit page. | 1. Tap on "Edit" Button. 2. Input valid product details with a description containing special characters 3. Tap "Terbitkan" button. | The product is successfully edited, and a success message is displayed. | The product is successfully edited, and a success message is displayed. | PASS |
| | | | Upload Image with Supported Format | Verify that an image can be successfully uploaded when it is in a supported format (e.g., JPEG, PNG). | Seller is logged in and on the product edit page. | 1. Tap on "Edit" Button. 2. Tap the "Upload Image" button. 3. Select an image file in JPEG format. 4. Tap "Terbitkan" button. | The image is successfully uploaded, and a thumbnail or preview is displayed. | The image is successfully uploaded, and a thumbnail or preview is displayed. | PASS |
| | | | Upload Image with Maximum Allowed Size | Verify that an image of the maximum allowed size can be uploaded. | Seller is logged in and on the product edit page. | 1. Tap on "Edit" Button. 2. Tap the "Upload Image" button. 3. Select an image file at the maximum allowed size. 4. Tap "Terbitkan" button. | The image is successfully uploaded, and a thumbnail or preview is displayed. | The image is successfully uploaded, and a thumbnail or preview is displayed. | PASS |
| | | Negative Test | Empty Fields | Verify behavior when submitting with empty fields | Seller is logged in and on the product addition page. | 1. Leave all fields (Nama Produk, Harga Produk, Kategori, Deskripsi, Upload gambar) empty. 2. Tap the "Register" button. | The product is not added, and an error message is displayed indicating that the product name is required. | The product is not added, and an error message is displayed indicating that the product name is required. | PASS |
| | | | Add Product with an Empty Name | Verify that the system prevents edited a product with an empty name. | Seller is logged in and on the product addition page. | 1. Tap on "Edit" button. 2. Input valid product details but leave the product name empty 3. Tap "Terbitkan" button. | The product is not added, and an error message is displayed indicating that the product name is required. | The product is not added, and an error message is displayed indicating that the product name is required. | PASS |
| | | | Add Product with a Name Exceeding Maximum Length | Verify that the system prevents edited a product with a name that exceeds the maximum allowed length. | Seller is logged in and on the product addition page. | 1. Tap on "Edit" button. 2. Input valid product details but use a name that is longer than the allowed length 3. Tap "Terbitkan" button. | The system stops accepting input when the character limit is reached, and may display an error message. | The system stops accepting input when the character limit is reached, and may display an error message. | PASS |
| | | | Add Product with a Duplicate Name | Verify that the system prevents edited a product with a name that already exists. | Seller is logged in and on the product addition page. A product with the same name already exists. | 1. Tap on "Edit" button. 2. Input valid product details but use a name that already exists 3. Tap "Terbitkan" button. | The product is not added, and an error message is displayed indicating that the product name already exists. | The product added, and an error message is not displayed indicating that the product name already exists. | FAILED |
| | | | Add Product with Name Containing Only Special Characters | Verify that the system prevents edited a product with a name that contains only special characters. | Seller is logged in and on the product addition page. | 1. Tap on "Edit" button. 2. Input valid product details but use a name that contains only special characters 3. Tap "Terbitkan" button. | The product is not added, and an error message is displayed indicating that the product name is invalid. | The product is added, and error message is not displayed indicating that the product name is invalid. | FAILED |

| | | | | | | | | | |
|--|--|--|--|---|---|--|--|---|--------|
| | | | Add Product with a Blank Name Containing Only Spaces | Verify that the system prevents edited a product with a name that contains only spaces. | Seller is logged in and on the product addition page. | 1. Tap on "Edit" button. 2. Input valid product details but use a name that contains only spaces | The product is not added, and an error message is displayed indicating that the product name is invalid. | The product is not added, and an error message is displayed indicating that the product name is invalid. | PASS |
| | | | Add Product with Negative Price | Verify that the system prevents edited a product with a negative price. | Seller is logged in and on the product addition page. | 1. Tap on "Edit" Button. 2. Input valid product details but use a negative price 3. Tap "Terbitkan" button. | The system stops accepting input when the price is negative. | The system stops accepting input when the price is negative. | PASS |
| | | | Add Product with Price Exceeding Maximum Allowed Limit | Verify that the system prevents edited a product with a price that exceeds the maximum allowed limit. | Seller is logged in and on the product addition page. The maximum allowed price is defined (e.g., 99999....). | 1. Tap on "Edit" Button. 2. Input valid product details but use a price exceeding the maximum allowed limit 3. Tap "Terbitkan" button. | The system stops accepting input when the character limit is reached, and may display an error message. | The system stops accepting input when the character limit is reached. | PASS |
| | | | Add Product with Non-Numeric Price | Verify that the system prevents edited a product with a non-numeric price. | Seller is logged in and on the product addition page. | 1. Tap on "Edit" Button. 2. Input valid product details but use a non-numeric price 3. Tap "Terbitkan" button. | The product is not added, and an error message is displayed indicating that the price must be numeric. | The product is not added, and an error message is displayed indicating that the price must be numeric. | PASS |
| | | | Add Product with Empty Price Field | Verify that the system prevents edited a product when the price field is empty. | Seller is logged in and on the product addition page. | 1. Tap on "Edit" Button. 2. Input valid product details but leave the price field empty 3. Tap "Terbitkan" button. | The product is not added, and an error message is displayed indicating that the price is required. | The product is not added, and an error message is displayed indicating that the price is required. | PASS |
| | | | Add Product with Price Containing Special Characters | Verify that the system prevents edited a product with a price that contains special characters. | Seller is logged in and on the product addition page. | 1. Tap on "Edit" Button. 2. Input valid product details but use a price with special characters 3. Tap "Terbitkan" button. | The product is not added, and an error message is displayed indicating that the price is invalid. | The product is not added, and an error message is displayed indicating that the price is invalid. | PASS |
| | | | Add Product without Selecting a Category | Verify that the system prevents edited a product when no category is selected. | Seller is logged in and on the product addition page. | 1. Tap on "Edit" Button. 2. Input valid product details but leave the category unselected 3. Tap "Terbitkan" button. | The product is not added, and an error message is displayed indicating that the category is required. | The product is not added, and an error message is displayed indicating that the category is required. | PASS |
| | | | City Field with Numbers Only | Test add product with a city name consisting of numbers only. | User is on the form screen. | 1. Enter a city name with numbers only (e.g., "12345") in the "City" field. 2. Complete any other required fields. 3. Submit the form. | The system displays an error message indicating that the city name must contain letters, not just numbers. | The system do not displays an error message indicating that the city name must contain letters, not just numbers. | FAILED |

| | | | | | | | | | |
