Title	[Profile][Phone Number] No Error Message Displayed for Invalid Characters in Phone Number Field
Desc	The system does not provide feedback or display an error message when invalid characters are entered in the Phone Number field. This lack of validation can lead to the entry of incorrect phone numbers, affecting data accuracy and functionality.
Steps	4. Open the application and navigate to the Phone Number field. 5. Enter a phone number with invalid characters (e.g., letters, special symbols like -). 6. Submit the form or save the entry.

Title	[Profil][Nav Bar] Overflow Button Appears Unexpectedly and Becomes Non-Functional When Window is Minimized
Desc	The overflow button (three-dot menu) suddenly appears when the application window is minimized, despite not being present in the full-screen mode. Additionally, when this button appears, it does not respond to any user interaction, making it non-functional and potentially confusing for users.
Steps	4. Open the application and ensure it is in full-screen mode. 5. Verify that the overflow button is not visible in the navigation bar. 6. Gradually reduce the size of the application window. 7. Observe that the overflow button appears as the window is minimized. 8. Attempt to click on the overflow button.
